

Distance between centers: 8,000 mm
Max. weight of workpiece: 5,000 kg

Proven grinding technology in new dimensions

PLC-controlled grinding machine for large components

- Distance between centers: 8,000 mm
- Max. weight of workpiece: 5,000 kg
- Max. grinding length: 8,000 mm
- Height of centers over table: 500 mm
- Max. swing over table: 995 mm
- PLC-Control with touch screen

The fixed workpiece shown in the image has following dimensions:

Guide rod:

- Diameter: 300 mm
- Component length: 8,000 mm
- Component weight: 4,440 kg

We are your reliable partner for grinding and hard chrome plating of components in large dimensions and for the delivery of ready-to-install mechanical components.
